

HRApay

Payroll Processing

Any successful business understands the importance of optimising efficiency and keeping costs to a minimum. With something as integral as ensuring that your staff are paid the right amount on time every month, you can't afford to pay over the odds but neither can you compromise on the quality of this service. If HR Advantage takes care of your payroll processing you can rest assured that you are paying a competitive rate for an exceptional service delivered through a dedicated payroll specialist providing payroll services throughout the United Kingdom.

We have had experience with numerous payroll bureaus over the years and we know just how significant the difference can be in terms of quality and accuracy of service. This is why we have worked hard to establish a special payroll partnership to complement and add even more value to our HR administration and PeopleLog HR database services. This said our payroll processing services are available on a stand alone basis as well as part of a wider service package. In addition we can offer onsite bespoke payroll training to all levels and payroll staff cover at a moments notice.

Our payroll processing includes the following:

- Timely processing
- Clear and easy to follow management reports for each payroll period
- Security payslips dispatched to client or directly to employees
- Payments made by BACS
- HMRC notices received directly from HMRC and applied automatically
- End of Year returns submitted to HMRC online
- P60's dispatched to client or directly to employees
- Integration with our PeopleLog HR Database or HR database of your choosing
- CIS compliance

The stand-alone fee for the service is from just £2.50 per payslip per month and from £10 per employee at year end. The set-up fee is between £50 and £1500. The fees for wider service package users are of course discounted and start at just £2.00 per payslip per month and from £5 per employee at year end. In many cases set up will be completely free.
